

That's right. With our new lease to own program, the substantial savings you'll realize by lowering your diesel fuel, maintenance and labor costs, actually covers your monthly lease payment. Sound too good to be true? Let us crunch the numbers for you.

You've already made the environmentally responsible decision to lower your emissions and accrue carbon credits in return. Now, thanks to our partnership with

Energy Capital Ltd., you can also make a smart business decision – eliminate your upfront capital investment by signing up for a cost-neutral financing plan that will make even the most prudent CFO smile.

Now that's good for the environment... and your bottom line.
